

WOTORI

Decentralised Animation Studio

Creator

Wotori

15 years in the industry of computer animation, game design and software development. Master of Design. Mastering computer science.

Problems

Artist sells rights on his work to studio receiveing one-time payment.
Studio endlessly monetizes artist's art.

Artists are mostly on their own, no mechanics to interact with artist from another medium.

Many people want to get involved but don't know how to draw or work in 3D.

Sophisticated copyright system.

WOTORI

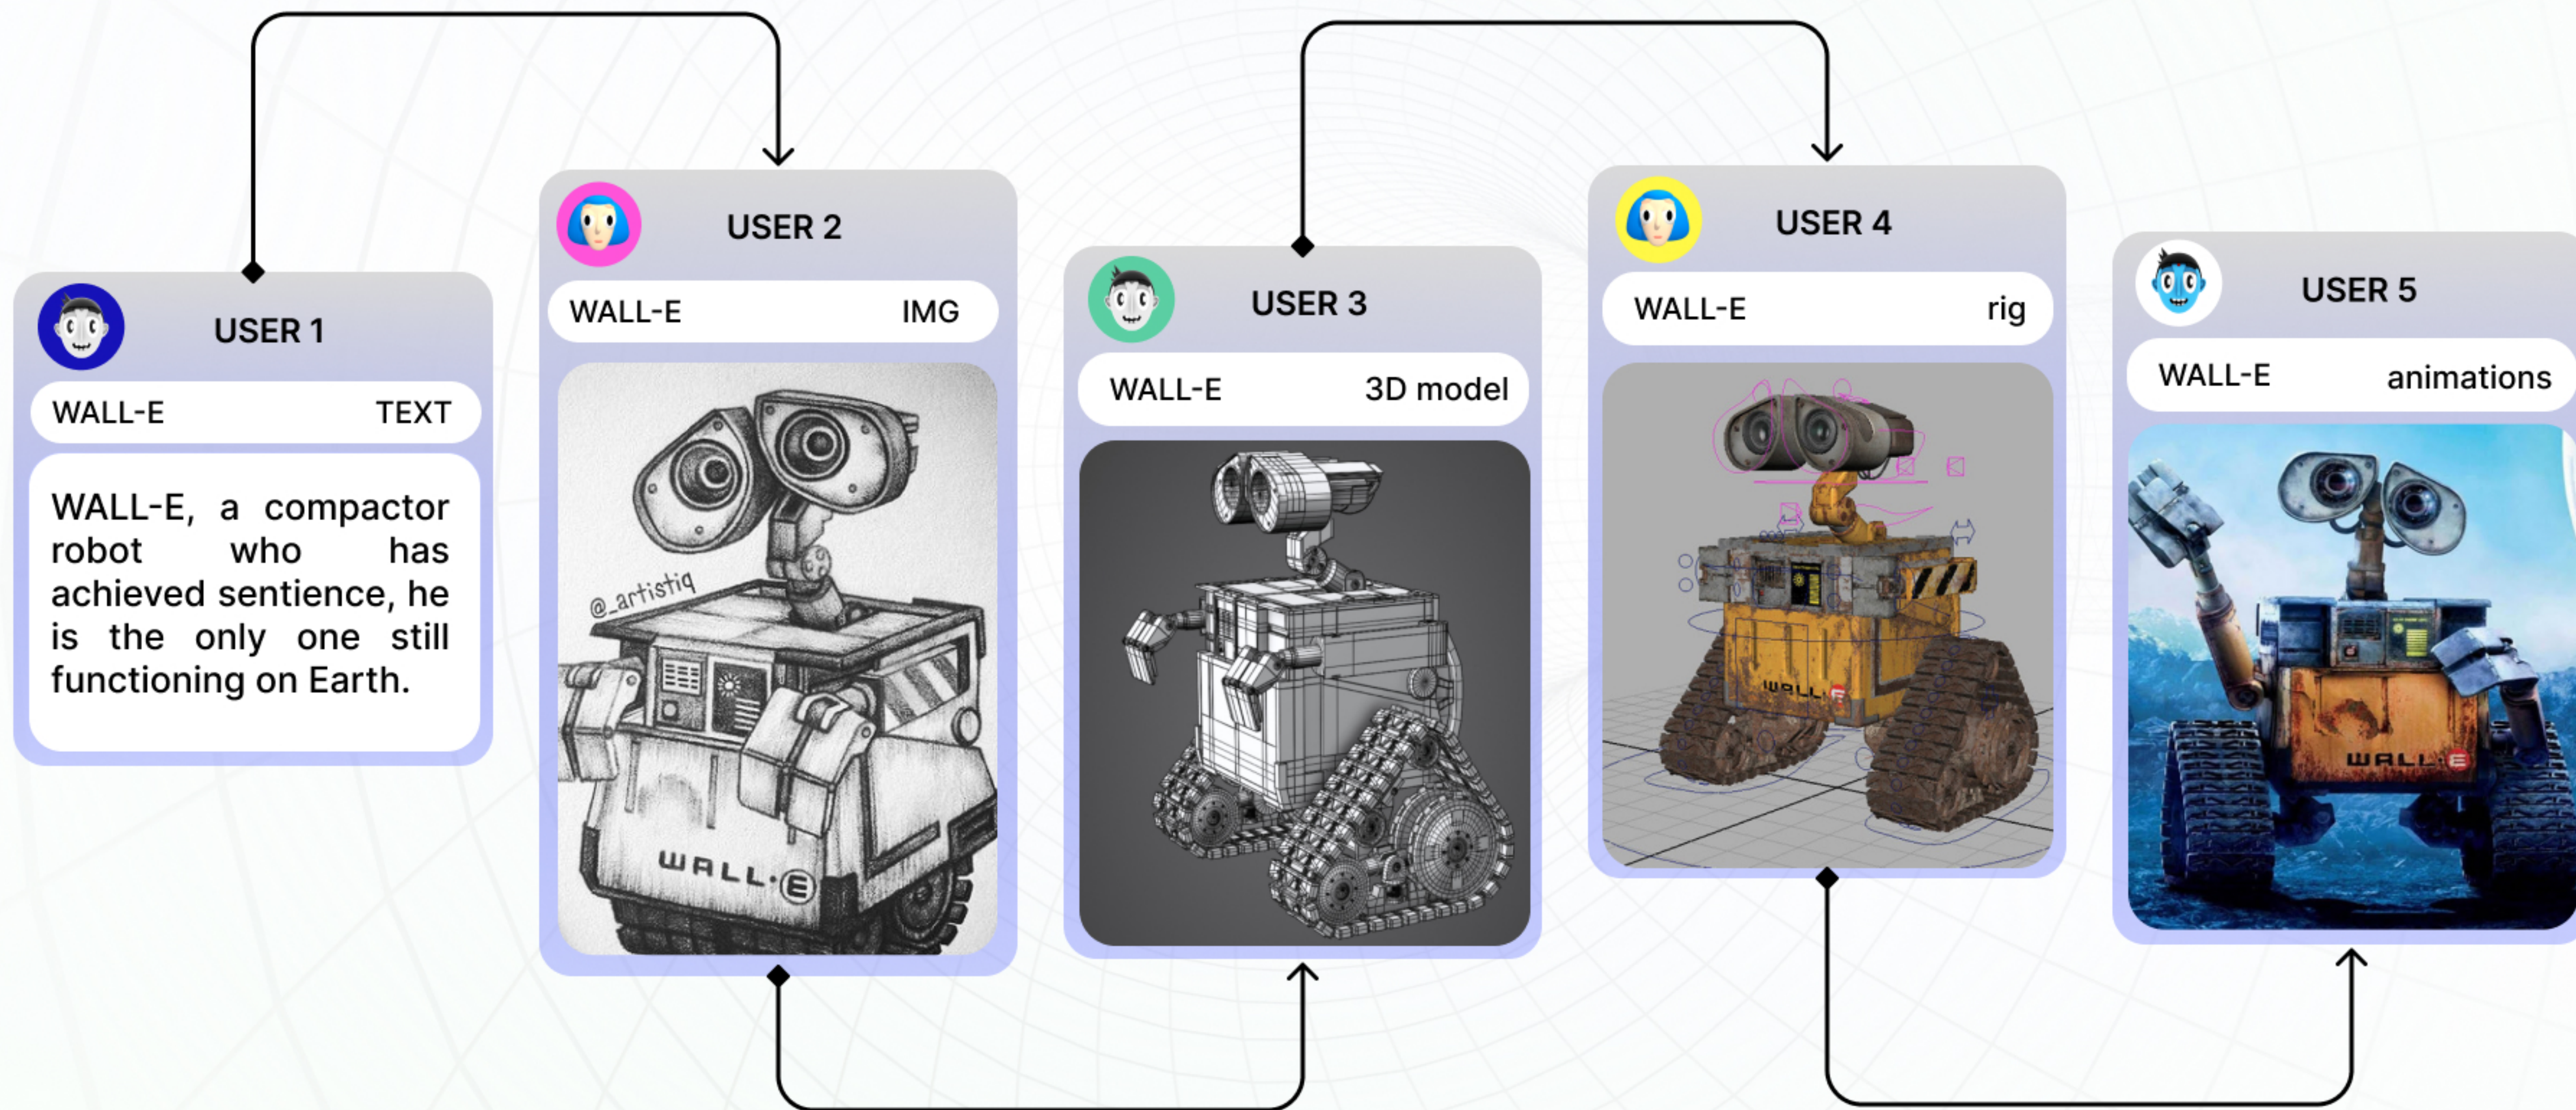

worlds + stories

Decentralised animation studio where people can collaborate on content creation, share stories, build games, animated movies, worlds and earn profit when their content used in games, animations e.t.c. by users and developers.

Wotori ecosystem is being built as decentralised application on the Archway chain in the Cosmos Ecosystem.

Core concept

github like platform for artists

Solutions

The artist owns their art for life and receives royalties when the work is used.

Simplified mechanics of cooperation, interaction and joint earnings.

Such a mechanics that allow anyone can contribute simply by writing a text.

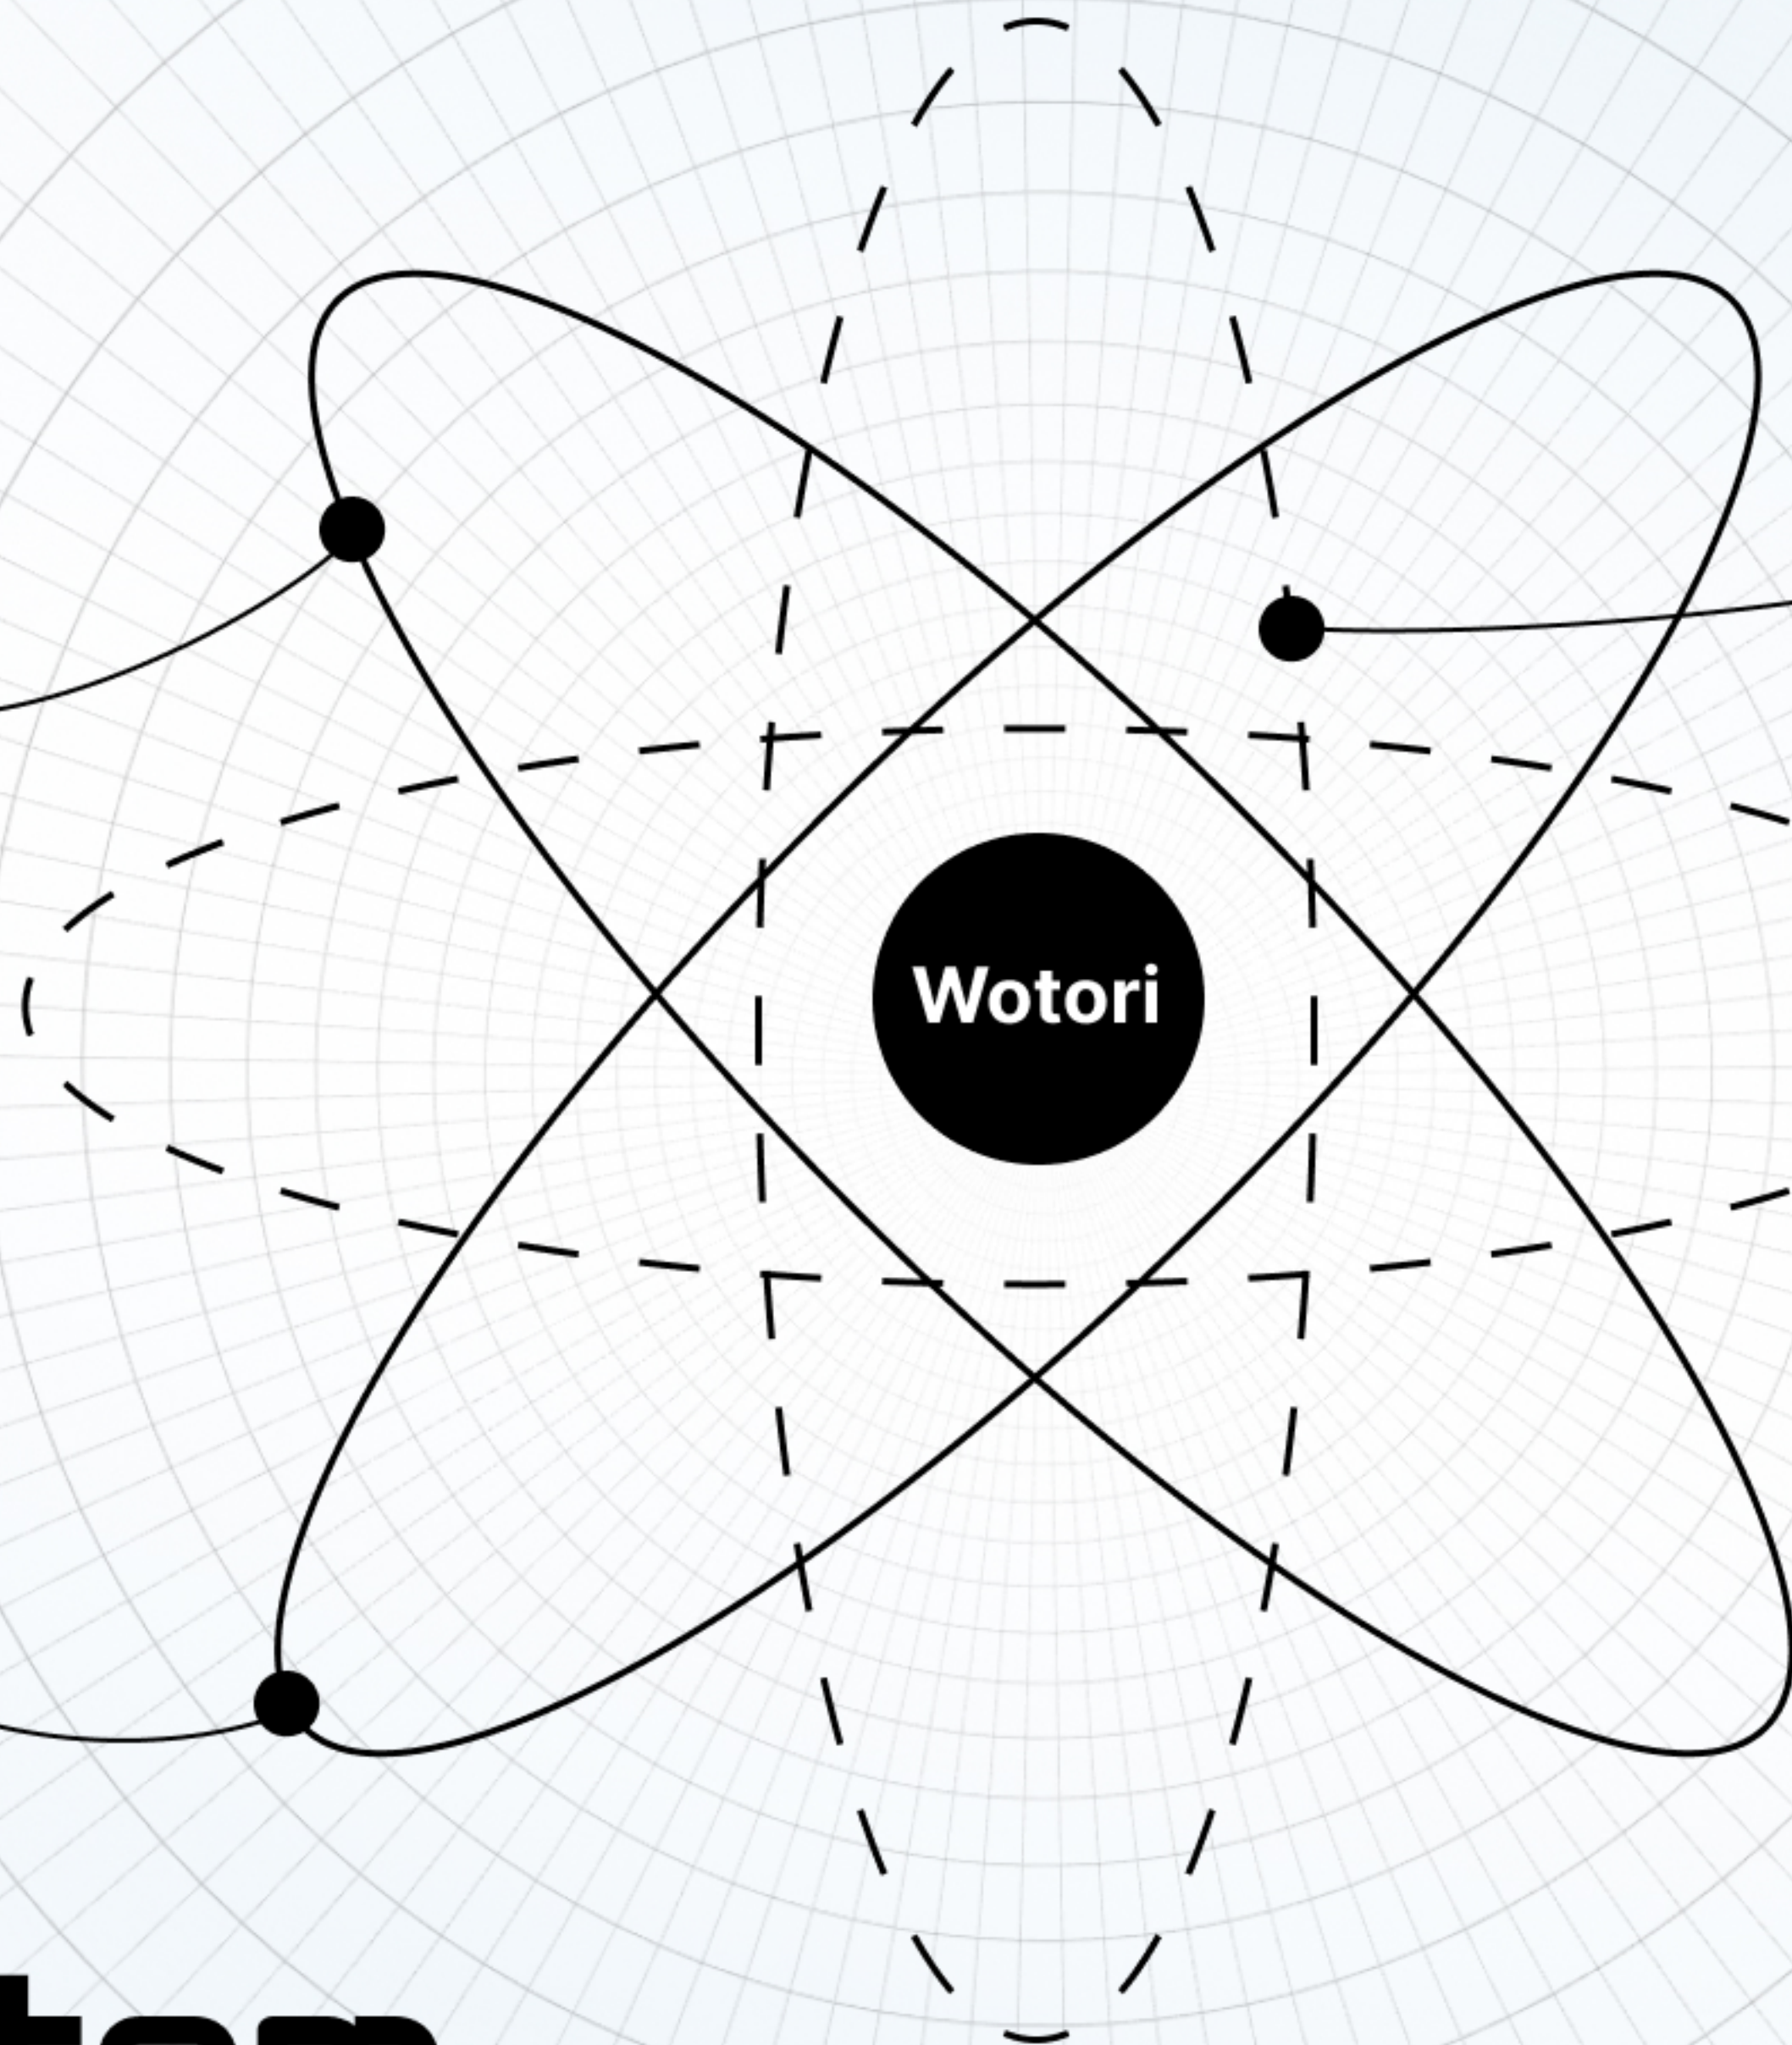

Smart contract setup system for managing commissions between participants.

Generative UI interface from user perspective

The user interface displays a cartoon illustration of a pink and white spotted creature with horns, sitting in a pool of water. A blue character is visible in the background. To the right of the illustration, the following text is displayed: 'available: 3/27', 'rent: 12\$/day', and 'buy: 1200\$'. Below this text are two blue buttons: 'BUY' and 'RENT'. A blue arrow points from the 'TRUE RENT' box in the creator's perspective to the 'RENT' button in the user's perspective.
